

Think Logic
Systems Inc

Capability Statement

Who are we?

[Think Logic Systems](#), Inc. is a

- Quality-focused, process-driven, and customer-centric IT solutions provider with over nine years of experience serving State, Federal government agencies and Private Sector.
- Our commitment is to consistently surpass client expectations by delivering superior products and services on time and within budget.

What Makes Us Different?

STAFFING

Enhance Your Workforce

Expand IT capabilities with **flexible staffing** solutions, including temporary staff augmentation or dedicated teams. Our Staffing Service helps IT departments facing resource constraints by providing interim personnel increases

PROJECT SOLUTIONS

On Time, On Budget

We provide **customized, project-based services** with defined deliverables, outlining scope, timeline, and costs upfront for **complete transparency** on duration and expense to achieve your desired outcomes

MANAGED SERVICES

Reduce Overheads, Improve Efficiency

We provide **operational management** for your technology environments, offering **technical expertise, consistent service** across various vendors and locations, and established, standardized methodologies to reduce overhead and improve efficiency

OUTSOURCING

Cost-Effective Delivery Model

We offer a sustainable method for **developing and maintaining a competitive advantage**. Our delivery framework strategically blends **onsite, nearshore, and offshore teams** to optimize global capabilities, local accountability, and exceptional delivery. This balanced approach ensures cost-efficiency while upholding quality and responsibility

Think Logic System's Core Capabilities

DIGITAL

Enable clients to transition from Digital thinking to a fully Digital operation

Optimize IT Infrastructure

Build agile, secure, service-oriented IT infrastructure and unified experiences.

ANALYTICS

Statistical analysis, machine learning, and data mining to convert raw data into actionable business insights

CLOUD

Develop a customized cloud strategy to serve as your foundational platform for innovation and expansion.

Optimize IT Infrastructure

NETWORK SERVICES We advise, implement, build, support, and manage enterprise networks, optimizing their performance, cost, and security.

DATA CENTER We offering refreshes to the data center infrastructure, or complete transformations for improved compute capabilities.

MANAGED SERVICES Our managed services address daily IT needs, allowing internal IT to focus on strategic growth and efficiency in complex environments.

SECURITY & GRC SERVICES We develop comprehensive security approaches to mitigate risks from new technologies and meet evolving regulatory requirements.

CONTACT CENTER Our solutions integrate backend systems with contact center applications, simplifying processes for improved communication management.

SERVER MANAGEMENT & VIRTUALIZATION We provide continuous administration and engineering for Windows, VMware, Citrix, UNIX, and Linux environments to ensure availability and performance.

ANALYTICS

BUSINESS INTELLIGENCE & ANALYTICS Unleash creativity and discover hidden opportunities within your data. Gain actionable insights and answers to drive your business forward.

BIG DATA In today's information age, businesses face an ever-increasing volume, variety, velocity, and complexity of data. Develop a robust Big Data strategy to effectively leverage this wealth of information from diverse and rapidly expanding sources.

PREDICTIVE ANALYTICS Transform raw data into valuable business intelligence using advanced analytical techniques. Through statistical analysis, predictive modeling, machine learning, data mining, text analytics, optimization, and real-time scoring, gain actionable insights.

MASTER DATA MANAGEMENT Efficiently govern your critical business and customer information that is distributed across various applications, systems, and databases.

Cloud Strategy and Implementation

Cloud Strategy We specialize in crafting bespoke cloud strategies that serve as a robust foundation for your innovation and growth. Our experts navigate the complexities of available cloud platforms to pinpoint the ideal solution tailored to your unique requirements.

Cloud Applications Building and utilizing cloud applications necessitates a modern approach. Embracing the cloud during your digital transformation will amplify its benefits across your entire organization.

Transitional Services Leveraging our extensive industry knowledge and practical experience, we ensure a rapid and secure migration of your applications and infrastructure to the cloud.

DevOps For enterprises striving for cloud success, DevOps is indispensable. It empowers continuous delivery of new features and innovations. We provide the necessary tools to establish a seamless continuous integration and continuous delivery (CI/CD) pipeline, streamlining development, testing, and operations.

Our Presence!
